## Developing Budding Managers with a Global Mindset

The economic downturn of 2008 led Professors of the world's top MBA programs scurrying to update their courses to address the economic, strategic and ethical factors behind the global financial crisis. A decade later the world in order to protect its humanity and economy is aspiring to build world class businesses, financially robust across business cycles, with global stewardship as the dominant business logic. Hence the current onus on B-Schools is to develop leaders who can envision and create a world of inclusive globalization based on the Golden Rule of Humanity. At JIMS, in line with our vision, we are fully committed to developing global professionals and entrepreneurs who exemplify human values, are socially responsible citizens and can create and disseminate practitioner-oriented knowledge that will integrate the world's societies. Our distinguished Board of Studies and Research, which constantly tracks global changes, has this year redesigned the PGDM Curriculum by incorporating core and elective courses such as Business Analytics and Consulting, Entrepreneurship, Financial Analysis and Fraud Management, Leading Global Teams and Cross – Cultural Management. This is in addition to the courses in Business Values and Ethics and Governance and Sustainability introduced last year to meet industry requirements. In conclusion it needs to be emphasized that in line with our vision we will endeavor to cultivate in our students a global mindset competence that is passionately oriented towards a world of inclusive globalization. To this end our strategic focus in future will continue to address areas of curriculum design that will stimulate students to reason critically and holistically, using qualitative and quantitative methods, to advance the cause of all our stakeholders.

– Dr. Amit Gupta  
(Chairman Jims Kalkaji)
