Introduction

The course on Corporate Strategy is a build up over the first year course of Business Strategy. Corporate strategy is a natural transition from business strategy in multi-business organizations. The two put together provide appropriate coverage to the strategic management process. Corporate strategy deals with the ways in which a corporation manages a set of businesses together (Grant, 1995). It explores how firms build advantage through value creation in the multi-business organizations. It addresses some of the most fundamental questions in strategy: What businesses should a company be in? How should it coordinate activities across businesses? What role should the corporate office play? What happens when firms cross borders? The course also addresses the critical issue of strategy implementation. Often a superior implementation of an ordinary strategy can outperform the poor execution of a brilliant strategy. It is imperative that the students are up to date with the concepts and their applications from the first year course of Business Strategy to gain an integrated understanding of the subject from a general management perspective.

Course Objectives

- To understand the basis on which companies can make corporate decisions that creates rather than destroys value.
- To assess the advantages of vertical integration and outsourcing in organizing vertically related activities.
- To determine the relative merits of diversification and strategic alliances in exploiting the linkages between different businesses.
- To analyze the critical issues related to strategy implementation and execution.

Pedagogy

This course will require you to read books, articles, case studies and perform literature search. The sessions would be interactive where attempt will be made to understand the theories and concepts through discussion of the readings and their application in cases. Hence a high degree of preparation is expected from the student. Readings, case analysis, and role plays will be required for you to effectively participate in class and make impromptu or scheduled presentations of issues and learning's. Besides the readings, groups of students will have to work on a comprehensive research project to investigate and validate some of the key learning's in a real world situation.

Course Requirements

- **Prescribed Textbook:** All students will be required to refer to the book by Robert M Grant, "Contemporary Strategy Analysis" Published by Blackwell Publishing (latest publication), which has been prescribed for the course on Business Strategy as well. Many more readings and cases from outside the Grant book will also be used and will be provided by the Institute.
- **Quizzes:** The quizzes will be based on the course covered in the previous classes Therefore keeping pace with the course covered will be important. There will be 2 quizzes spread across the course. Both quizzes are compulsory.
- **Group Project:** Each group is expected to work on the term project allocated by the instructor. Project evaluation will be based on the presentation and report submitted by the group.
