**Course Introduction:**

Marketing research has gained prominence over the years as an integral and initiating component of the marketing process. As consumers are getting spoilt for choices and product life cycles are shrinking by the day, the margin for error by marketer in deciphering consumption behaviour is decreasing. A robust marketing research process acts as a bridge between marketer and consumers. It assesses manager's information needs and provides management with relevant, accurate, reliable, valid and current information to aid marketing decision making. Companies using marketing research judiciously stay competitive and are able to avoid incurring high costs of poor decisions based on unsound information.

**Learning Outcomes:**

The following are the learning outcomes of the course:

1. To gain in-depth conceptual understanding of statistical methods of data analysis.
2. To be able to relate management problem, research problem and relevant technique of statistical analysis.
3. To gain proficiency in operating statistical analysis tools (SPSS and Excel).
4. To gain proficiency in generating consumer insights out of marketing research.

**Course Pedagogy:**

The sessions will be a blend of interactive lectures, case analysis and data analysis using relevant techniques & tools. Students are expected to bring Laptop and use the software SPSS/Excel for analysis.

**Course Readings:**

1. Nargundkar, Rajendra (2003). *Marketing Research: Test and Cases*, 2<sup>nd</sup> Edition. Tata McGraw Hill Education [RN]
2. Malhotra, N.K. and Dash, S.B. (2011). *Marketing Research: An Applied Orientation*. Pearson Education. [MD]
3. Hair, Jr., J. F., Black, W. C., Babin, B. J., Anderson, R. E., and Tatham, R. L. (2006). *Multivariate Data Analysis*, (6<sup>th</sup> Edition). Pearson Education, New Delhi.
4. Chawla, D. and Sondhi, N. (2011). *Research Methodology: Concepts and Cases*. Vikas Publications.

5. George, D. and Mallery, P. (2008). *SPSS for Windows Step by Step: A Simple Guide and Reference*. Pearson Education.

**Course Evaluation criteria:**

Component	Weight
Field project* (Questionnaire designing & sample size = 5%; Analysis & report = 5%; Managerial implications = 5%; Communication and project defense = 5%)	20%
Quiz	20%
Class participation/Assignment submission	20%
End-term	40%
<b>Total</b>	<b>100%</b>

\*Project details: It is a group project. Students are expected to use all the knowledge and training being given in the class room to unearth insight from the market. The objective is to provide the students a platform for getting hands-on experience on application of marketing research to aid managerial decision-making.

The project can be undertaken in the following areas by using relevant marketing research techniques:

Project Area	Marketing Research Technique
Customer Satisfaction Survey	Multiple Regression Analysis
New Product Development	Conjoint Analysis
Market Segmentation Analysis	Cluster Analysis
Consumer Research	Multiple Discriminant Analysis
Brand Research	Multi-Dimensional Scaling
Advertising Research	Exploratory Factor Analysis

**Running case:**

1. IBM – The world’s top provider of computer hardware, software, and services.

**Session Plan:**

### Academic integrity

- a) **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in IMI and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.
- b) **Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at IMI and will invite penalty as per policies of the Institute.
