**Office hours:** 9: 30 a.m. - 5.30 p.m.

### **Course Introduction:**

Till 1990s, the primary goal of any organization was to deliver the best possible customer service through coordinated management of its internal resources. Gradually, it started realizing that in a globalized economy today, managing its internal resources was not adequate to outperform others in the marketplace. Rather, it needs collaborative and mutually beneficial relationship with all channel partners to achieve superior operating performance, gain competitive advantage, and provide better value to its customers. The concept of Supply Chain Management evolved out of this necessity to efficiently integrate all channel members so that right goods are sourced and produced in right quantities and distributed to the right locations, on time, and at minimum cost.

Therefore, the supply chain strategies, concepts, and analytical tools learnt in the course can prove to be very useful to design and improve supply chain performance so that wastages are reduced, and increased value is delivered to customers.

### **Learning Outcome:**

1. To develop competence and skill sets in using SCM concepts in a variety of contexts.
2. To display familiarity with supply chain concepts and how supply chain concepts can be used to improve the competitive position of the firm.
3. To formulate proper supply chain strategies.

4. To develop analytical tools to solve supply chain problems.
5. To design supply chain networks.
6. To manage risks in supply chain.

**Course Pedagogy:**

1. Class will be a mix of interactive lectures, case discussions, games, simulations and projects.
2. Each class will start with a presentation of relevant case by a group of students who will also cover the topic planned for that class.

**Course Evaluation criteria:**

<b>Evaluation Components</b>	<b>Marks</b>	<b>LO attainment</b>
Class participation	10	LO1
Quiz -2 Nos	20	LO1, LO2, LO3, LO4
Mid Term Examination	30	LO1, LO2, LO3, LO4, LO5, LO6
End Term Examination	40	LO1, LO2, LO3, LO4, LO5, LO6
Total	100	

## Plagiarism

We are committed to upholding the highest standards of academic integrity and honesty. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. You may refer the already available content just for your reference and to get the basic ideas. Only 20% of such content is acceptable, above that comes under the definition of Plagiarism which is unacceptable in IMI and will be treated seriously. All such cases will be referred to the appropriate body of the Institute for suitable disciplinary action.
